

PRESS RELEASE

**Fratelli Cosulich S.p.A.
achieves ISCC Certification**

September 2023

Fratelli Cosulich, a leading global provider of maritime services, is proud to announce its successful attainment of the **International Sustainability and Carbon Certification (ISCC)**.

This certification underscores **Fratelli Cosulich's unwavering dedication to implementing sustainable practices** throughout its operations, and signifies a milestone in the company's commitment to environmental stewardship.

The ISCC certification is a globally recognized standard that verifies compliance with **stringent sustainability and carbon reduction criteria**. It encompasses a comprehensive set of requirements, evaluating the responsible sourcing of raw materials, supply chain management practices, land use, greenhouse gas emissions and social aspects of a company's activities.

By achieving this certification, Fratelli Cosulich S.p.A. has established itself as a responsible industry leader in driving sustainable practices from sourcing to production, ensuring the traceability and sustainability of raw materials used in its operations.

Fratelli Cosulich S.p.A.'s customers can be assured of the company's **adherence to high environmental standards** and its **contribution to a more sustainable future**.

"We are extremely proud to have achieved the ISCC certification", said **Guido Cardullo, Head of Business Development of Fratelli Cosulich**. "The certification of our headquarters in Genova is just the first step; all our offices worldwide are in the process of being certified under ISCC.

It is a **testament to our ongoing efforts to operate in an environmentally responsible manner** and to meet the highest sustainability standards. We remain committed to reducing our carbon footprint, promoting sustainable practices throughout the maritime industry, and contributing to a greener planet."

The company's dedication to environmental stewardship not only aligns with European standards in reducing its impact on the environment, but also proves its approach to sustainability by **investing in cleaner technologies**.

Fratelli Cosulich is building **two LNG bunker vessels** which will be delivered in the next months.

The Company is also building a **methanol barge** which will be delivered in Q2 2024, and is considering ordering a second one. It has also completed a feasibility study for an ammonia bunker barge, participating **since November 2021 in a joint development project** with Singapore-based vessel designer **SeaTech** and Italian maritime classification society **RINA**.

Committed to sustainability, Fratelli Cosulich continually strives to minimize its environmental impact and promote responsible practices across its operations.

The Company is a global leader in providing maritime services, specializing in ship agency, freight forwarding, logistics, and bunkering.

With a heritage spanning over 160 years, the company has built a reputation for delivering exceptional customer service and innovative solutions to clients worldwide.
