Archimede Gruden merges into Express Global: a strategic move to strengthen their key role in Freight Forwarding

Naples - Venice, 02 January 2025

Fratelli Cosulich Group is pleased to announce the official **merger of Archimede Gruden into Express Global Italy**, effective January 1st, 2025. This strategic move unites two established players in the freight forwarding sector under the Express Global brand, reinforcing their combined expertise and strengthening their position in both domestic and international markets.

This merger represents a continuation of a broader initiative within the Group. Over the past year, similar steps have been taken with the integration of GRUDEN USA into Express Global USA and the rebranding of AGS HK to Express Global HK. These actions are part of a **unified strategy to align operations globally**, offering enhanced value and consistency to clients worldwide.

Express Global brand, with over 20 years of experience, **provides a full spectrum of freight forwarding services, including sea, air and road transportation**. Its strategically located offices, **in Italy and other 13 countries**, serve as key logistics hubs, connecting all international trade routes.

Following the acquisition in 2020, the actual merger of Archimede Gruden, a company known for its customer-centric approach and high-quality standards, will further expand Express Global's service portfolio, bringing additional expertise and tailored solutions to its clients.

This merger goes beyond branding — **it reflects a commitment to operational excellence and market leadership**. By leveraging the heritage and expertise of Archimede Gruden, Express Global aims to deliver even greater value to its customers, maintaining the Group's long-standing tradition of prioritizing quality and personalized service.
