

PRESS RELEASE

Anna Cosulich Delivery Ceremony

Anna Cosulich Delivery Ceremony

20 May, 2025

Fratelli Cosulich Marine Energy celebrated the delivery of Anna Cosulich, the Group's new generation of methanol-ready IMO II bunker tankers developed within its fleet expansion programme.

Delivered at the Taizhou Maple Leaf Shipyard (China), the vessel marks another important milestone for the Marine Energy business unit. The successful delivery reflects the continued collaboration and commitment of all parties involved throughout the construction and delivery process.

The vessel will now commence preparations for her maiden voyage to Singapore, where she is expected to support the Group's ongoing bunkering operations and further strengthen its presence in one of the world's leading bunkering hubs. All necessary arrangements and preparations are being carried out to ensure a smooth transition into operations ahead of her voyage.

We wish Anna Cosulich and her crew a safe voyage ahead and fair winds on her maiden journey to Singapore.
