Fratelli Cosulich Group strengthens its logistics network with the opening of Express Global Dubai

Fratelli Cosulich Group strengthens its logistics network with the opening of Express Global Dubai

Dubai, 21 September, 2026

Fratelli Cosulich Group announces the opening of Express Global Dubai, a new step in the international expansion of its freight forwarding activities and a further strengthening of the global presence of Cosulich Logistics.

The opening of Express Global Dubai marks an important development for the Group's logistics business and reinforces the role of Express Global as the leading freight forwarding brand within the Cosulich Logistics world. The new office will support the Group's ability to serve customers across strategic international trade lanes, while further enhancing its presence in one of the most relevant logistics hubs worldwide.

Dubai is not a casual choice. Over the years, it has established itself as one of the most strategic gateways for international trade, thanks to its position at the crossroads of Europe, Asia and Africa, its advanced port and airport infrastructure, and its ability to connect major global supply chains. In a logistics landscape increasingly shaped by speed, flexibility and resilience, Dubai represents a critical platform for companies operating on a global scale.

For Fratelli Cosulich Group, this opening also builds on an already established presence in the area. The Group has been active in Dubai for several years through its Marine Energy office, and the launch of Express Global Dubai further strengthens the Group's footprint in the region, expanding the scope of its activities and reinforcing the brand through which Cosulich Logistics operates in freight forwarding.

Augusto Cosulich: *"This new opening is particularly meaningful because it shows that, even in times marked by international tensions and possible global crises, entrepreneurs should not stand still. On the contrary, they should continue to invest, expand and enter even the most challenging environments in order to remain close to their customers and support their business. Logistics is the real lifeblood of global trade, moving goods across the world and connecting markets, industries and people. In an interconnected world such as ours, this also comes with a responsibility, and Dubai is a concrete expression of that responsibility."* stated **Augusto Cosulich, Chairman of Fratelli Cosulich Group.**

"This new company represents the latest milestone in a growth journey that began more than a quarter of a century ago in Italy and progressively expanded through offices in the United Kingdom, the United States, China, Hong Kong

*and lately Singapore. At the same time, this development has also been supported by our presence in Turkey through the Fratelli Cosulich and Mesco brands, without forgetting the more recent and important developments in Central Europe through the TPG Express brand. Express Global Dubai is therefore another important step in a broader international journey, built over time with consistency and a clear ambition to be closer to our customers wherever they operate.” commented **Lorenzo Momigliano, Head of Cosulich Logistics.***

The responsibility for the new logistics office will be entrusted to **Teresa Cosulich**, who will take on the role of **Managing Director** of Express Global Dubai. Teresa brings a transversal background developed across different sectors inside and outside of the Group, with her recent experience within **Trasteel**, the Group's business active in steel trading and processing. Her appointment reflects the Group's commitment to combining international growth with trusted internal leadership, capable of supporting the development of new business initiatives in strategic markets.

With the opening of Express Global Dubai, Fratelli Cosulich Group continues to invest in the expansion of its logistics network, strengthening its ability to support customers with reliable, international and increasingly integrated freight forwarding solutions.
